## V-LOCK LID

### CONCEALED SKIMMER LID

- ▶ SEAMLESS ACCESS TO SKIMMERS AND SUMPS
- ▶ EASY INSTALLATION WITH NO ELECTRICAL BONDING
- ▶ DIECAST METAL KEY FOR ERGONOMIC AND SAFE LIFTING

# M30

FOR 1-1/4" STONE AND  
PORCELAIN INLAYS

# V-LOCK M30

CONCEALED SKIMMER LID FOR 1" ~ 1-1/4"  
STONE AND PORCELAIN INLAYS

V-LOCK sets the new standard for safe and seamless access to pool skimmers and sump pipes.

The award-winning V-LOCK lid design combines innovation with proven reliability. Made from reinforced engineering polymer, these skimmer lids deliver exceptional strength and weather resistance—without the need for electrical bonding.

M-SERIES lids are specially designed for the North American and European markets, offering safe, discreet access to popular pool skimmers and deck equipment.

The V-LOCK M30 features a flush-fitting profile that allows for easy, seamless installation of 1-1/4" (3 cm) stone, porcelain, and paver inlays—making it ideal for new builds and renovations. V-LOCK's vented, lockable design, ensures enhanced safety, a premium finish, and peace of mind.

PROUDLY DESIGNED IN AUSTRALIA FOR  
POOLS EVERYWHERE

## ROBUST & SECURE

V-LOCK's metal diecast key won't bend or break, providing safe, ergonomic lifting of lids.

## SMART DESIGN

Simple set-up and on-site installation for popular pool deck finishes, including porcelain and stone.

## SAFE & SECURE

V-LOCK's secure locking mechanism and perimeter venting delivers superior safety for pool users.

## NON-CONDUCTIVE POLYMER

V-LOCK's reinforced, UV-stable engineering polymer provides superior strength, rigidity, and weather resistance without the need for electrical bonding or the risk of unsightly tea-staining.

## VERSATILE

Ideal for both new builds and retrofit projects. Available in 1-1/4" depth to suit stone and porcelain inlays.
